Pandora's Chest  
Owner's Guide

Thank you for purchasing *Pandora's Chest*. This document guides you through the process of converting Pandora's Chest from an ordinary linen chest to an extraordinary play platform.

**Parts**

In one box, you should find:

1	Chest
2	Bolster/Kneeling Pads
1	Outrigger Block
2	Steel Outriggers (each in 2 halves)
1	Steel Crossbar (padded)
1	Velvet bag (containing small parts)
4	1 1/2" Knobs
4	3/8" Eyebolts with washers
4	1/2" Hole Plugs
2	1/4" Eyebolts
2	1/4" Curved-head Bolts
4	1/4" Acorn nuts
2	Keys
1	Handful of Foxy Furniture business cards to pass along to friends

## General Information

*Pandora's Chest* is designed to be a versatile platform for BDSM play. It can be used as a bondage bench, kneeling/spanking bench, a pelvic exam bench, and a standing bar. Each of the basic positions provides for a number of attachment points to accommodate different sized people and/or different positions. It can be used with one, two, or multiple subjects. And of course, it can be used in any combination you can dream up!

Play and experiment – and if you find a new and interesting position please drop an e-mail to [Hera@FoxyFurniture.com](mailto:Hera@FoxyFurniture.com) so we can share the information.

## Kneeling Pads

The removable Bolsters double as Kneeling Pads. They can be used at either or both ends of the Chest, or at the front – where it is possible to place the two of them side-by-side to double the fun.

1. Open the lid of *Pandora's Chest* and unscrew the Knobs that attach the Bolsters to the underside of the lid. Remove the Bolsters.
2. Lift one end of Chest a few inches above the floor and insert the two steel brackets of the Bolster up and into the body of the Chest to hold the Bolster/Kneeling Pad against the end of the Chest.

To use the Kneeling Pad(s) at front of Chest, open the rear drawer a little to make room for the brackets. Once the Kneeling Pads are positioned, close and lock the drawer to hold them in place.

3. Securing of limbs can be accomplished using the Chest legs or the 3/8" Eyebolts. To insert Eyebolts, carefully pop out the two Hole Plugs covering the holes at each end of the chest. Screw the 3/8" Eyebolts into the holes using the washers to protect the chest.

## Outriggers

1. Remove the Bolsters from Pandora's Chest as described in step 1 of "Kneeling Pads".
2. Remove the Outrigger halves and Outrigger Block from the drawer. Assemble the two Outriggers by screwing the top halves (the longer ones with male threads) into the bottoms (the shorter ones with the coupling attached). Note that we've left the orange protective cap on the top end of the top half for safety. It can be removed, but we strongly recommend that you leave it in place – it really helps you see the ends of the Outriggers during play.

3. Lift one end of Chest a few inches and position Outrigger Block so the Chest rests in the "groove" of Outrigger Block when lowered.

4. Screw 3/8" Eyebolts in place above Outrigger Block as described in step 3 of "Kneeling Pads". Optionally, insert the other two 3/8" Eyebolts into the opposite end to use as attachment points for securing limbs.
5. Insert Outriggers through Eyebolts and screw into the Galvanized Flange in Outrigger Block.

Pandora's Chest  
Owner's Guide

6. The ¼" Eyebolts can be inserted through any of the holes in the Outrigger and attached using Acorn nuts – just finger tighten.

7. The Crossbar attaches at any of three heights using two Curved-headed Bolts and Acorn nuts – again, just finger tighten.
